Residents housed	158
Annual rent revenue	\$1.21M
Jobs	80
Storefronts	10
Annual sales	\$6.27M

Planning estimates with editable assumptions, never an appraisal or a tax determination. Figures of record are stylized demonstration data. Cost = basis sqft × cost per sqft × mode adjustment × market multiplier. Value after investment = total investment × value factor. New annual property tax = value after investment × effective tax rate. The client team keeps the instrument. Partners receive the paper.
