Annual sales	$6.27M

DIAGRAM

ASSUMPTIONS

· 2 pillars in use
· Acquisition at 0% of assessed value
· Market profile: Small city, Alabama (cost × 0.9, value × 1.05, tax 0.90%)
· Alabama programs: state historic credit 25% up to $5M per project, ADEM Brownfield Program
· Sustainability off

HDDC PRINCIPLES CHECK

Non displacement: Holds. No building with an active use is slated for demolition.
Historic preservation: Holds. 2 buildings 50 years or older stay standing.
Sustainability: Watch. Sustainability is off.

Planning estimates with editable assumptions, never an appraisal or a tax determination. Figures of record are stylized demonstration data. Cost = basis sqft × cost per sqft × mode adjustment × market multiplier. Value after investment = total investment × value factor. New annual property tax = value after investment × effective tax rate. The client team keeps the instrument. Partners receive the paper.
